Sandeep M V N

Senior Manager Projects,
+91-8374740544 sandeep.mvn@deccansoft.net

Senior Manager with 10+ years of experience at Deccansoft, Senior delivering enterprise-grade platforms across healthcare, insurance, automotive, and media domains on Microsoft Azure. Deep expertise in ASP.NET Core, Web API, React, Entity Framework, Power BI and Azure cloud services with hands-on AI integration using Azure AI Foundry, Semantic Kernel, and Model Context Protocol. Led full delivery lifecycle for a cloud-native warranty claims system (WPI) and insurance analytics platform (RiskDX), including architecture, CI/CD pipelines, Power BI Embedded reporting, and UAT. Open-source contributor published React PDF annotator eliminating in third-party licensing. Azure Solutions Architect Expert certified. Demonstrated success in delivering enterprise-grade software solutions and driving technical excellence across multiple domains.

LinkedIn Profile:

https://www.linkedin.com/in/sandeep-mvn-29b01b74/

Certifications:

- Azure Solution Architect Expert
- Microsoft Certified: DevOps Engineer Expert
- Microsoft Certified: Azure Security Engineer Associate
- Microsoft Certified: Azure Developer Associate
- Microsoft Certified: Azure Fundamentals
- MCP: Developing ASP.NET MVC Web Applications

Experience Summary:

- Having around 10**+ years** of Experience as a software Programmer at **Deccansoft** In various Microsoft technologies, including **C#**, **Python, Fast API, Agents, RAG, MVC**, .**Net Core**, **Web API**, **Xamarin.Forms**, **WPF**, **SQL-Server, My SQL**, **Cosmos DB**, **Bootstrap, Java Script, jQuery**, **JSON**, **AJAX**, **React JS, Angular JS, Type Script, Angular, Azure Cloud, Azure DevOps (CI/CD), Docker, Power BI, Model Context Protocol, Semantic Kernel, Azure AI, Microsoft Purview and Microsoft Sentinel**
- Domain expert in development of **Windows**, **Mobile** and **Web based applications**.
- Extensive knowledge of Object-Oriented Programming.
- Experience in using **Entity Framework/Core** and **LINQ**.

Sandeep M V N

Senior Manager Projects,
+91-8374740544 sandeep.mvn@deccansoft.net

- Good Experience in using Client-Side Technologies such as HTML, CSS / Bootstrap, jQuery, JavaScript, AJAX, Json, XML, Angular JS, React JS, Angular and Typescript.
- Experience in Developing **Mobile Apps (Android/IOS**) using Xamarin.Forms.
- Good Knowledge on **WPF** using **MVVM** and **Prism Patterns**
- Experience in using **Windows Services** (.Net Framework/.Net 5/6/8)
- Experience in creating **CI/CD pipeline**.
- Experience in using **Team Foundation Server** (TFS) and **Azure DevOps (GIT).**
- Experience in deploying projects into **Azure and Go Daddy**
- Good Knowledge of **Azure**: App Services - Web Apps, API Apps, Logic Apps, Sql Server, MySQL, API Management, Service Bus, Event Grid, Key Vault, Storage Service, Functions, Web jobs Cosmos DB, Azure Container Registry, Azure Search Service and Webhooks,
- Good Knowledge of **Azure Open AI**, Language service**,** Form Recognizer, Content Moderator and Text Translations.
- Experience with **Power BI** across report development, workspace administration, and embedded analytics including end-to-end delivery for **WPI** (manager dashboards, dealer KPA watchlists, claim submission age reports, drill-down adjustment reports; workspace migration from personal to organizational; Per User PPU licensing) and **RiskDX** (insurance analytics reports deployed via **Power BI Embedded Service**); experienced in workspace access management and production environment setup

Education: BTech (Electronics and Communication Engineering) from Gudlavalleru Engineering College (Batch 2011- 2015)

Sandeep M V N

Senior Manager Projects,
+91-8374740544 sandeep.mvn@deccansoft.net

Technical Skills:

Programming/Scripting Languages/Technologies	C#, ASP.NET MVC, ASP.NET Core, XML, Web API, WPF & MVVM, Prism-Patterns, LINQ and EF, JavaScript, jQuery React JS, Bootstrap, HTML & CSS, Unit Testing, Angular, Azure Cloud and Azure DevOps
AI/ML	Azure Open AI Services, RAG, Open AI, Language Services, Form Recognizer, Content Moderator, Azure AI Search, Copilot Studio and Text Translations
App/Web servers	IIS, Microsoft: Kestrel web server
Databases	SQL Server, Document/Cosmos DB, PostgreSQL, My SQL
Architectures/ Frameworks	N-tier architecture, Repository Patterns, Multi-layered architecture, Micro-service-based architecture, Microsoft Enterprise architecture, Layered & modular architecture, Domain Driven Design implementation, MVC, NET Framework 4.8, .NET Core 2.1,2.2,3.1, .Net 5.0, 6.0,7.x,8.x & Object-Oriented Programming
Development/ Environment	Visual Studio 2013,2015, 2017,2019, 2022, VS Code
Operating Systems	Windows, Linux
Cloud Platform	Microsoft Azure
Version Tools	GIT (Azure DevOps & GitHub), TFS
Reports	Power BI

NPM Packages

@sandeepmvn/react-pdf-annotator-v2 | npmjs.com/package/@sandeepmvn/react-pdf-annotator-v2 | MIT License | v1.2.12 | https://github.com/sandeepmvn/react-pdf-annotator-v2-package

A feature-rich, open-source React PDF viewer and annotator built with TypeScript, PDF.js, and pdf-lib. Serves as a zero-cost alternative to Syncfusion's PDF annotation suite (licensed at $10,999/year), delivering the same enterprise annotation capabilities at no cost. Actively used in production at WPI (Warranty Processing Inc.) for dealer document workflows.

Key Features: PDF rendering with zoom and page navigation • Drawing tools (pen, highlighter) with customizable colors • Text annotation and shape tools • Digital signature support • Undo/redo history with

full annotation state management • Save/restore annotations to backend or localStorage • Read-only view mode • Fully typed TypeScript API

Built with: React 18, TypeScript, PDF.js, pdf-lib, Tailwind CSS | **Impact:** Eliminated $10,999/year Syncfusion licensing cost for the WPI project and the broader React community

Projects

Project #1@Deccansoft:

Title	:	Warranty Processing
Duration	:	Oct 2025 – till date
Team size	:	10
Position	:	Technical Lead & Solution Architect

Architected and delivered a cloud-native warranty claims management platform on Azure, replacing a legacy system (Cobalt) and onboarding an initial dealer cohort in Phase 1 with Phase 2 expansion targeting hundreds of automotive dealers

- Designed the end-to-end Azure infrastructure including App Service, Azure Functions (Flex Consumption), Service Bus, API Management, Key Vault, Application Insights, Storage Account, and Azure Email Communication Service — all deployed in Central US for low-latency client access
- Built the backend on ASP.NET Core with Entity Framework Core, implementing CQRS via MediatR, repository abstractions, and a robust claim lifecycle engine governing RO status transitions, billing validation, chargeback/reversal handling, and manufacturer payment reconciliation
- Developed React.js frontends for both a dealer portal and an internal operations portal, with role-based access, real-time updates via SignalR, and session management
- Integrated Azure AI Foundry (GPT model) and Azure Document Intelligence for automated claim classification (Complex vs Recall) and document processing, reducing manual triage effort
- Engineered a Ford FastPay CSV payment processing pipeline with multi-priority RO matching logic (exact, normalized, suffix, reverse suffix) and chargeback/reversal billing rules including a custom Difference Rule for accurate dealer invoicing
- Built QuickBooks IIF integration for automated invoice generation and implemented Power BI reporting workspaces with manager dashboards, dealer KPA watchlists, and drill-down adjustment reports
- Designed Azure SQL schema across two databases (claims and identity), authored comprehensive database documentation covering indexes, purge/retention policies, and backup procedures

- Implemented background processing with Azure Functions including a timezone-aware billing window expiry scanner and scheduled status recalculation jobs
- Designed and deployed Power BI reporting workspaces with manager dashboards, dealer KPA watchlists, claim submission age reports, and drill-down adjustment reports with export capabilities; managed workspace access, licensing (Per User PPU), and production environment setup
- Designed and deployed Power BI reporting workspaces including migrating legacy reports from personal workspaces to dedicated organizational workspaces (WPI Reports – Production); built manager dashboards, dealer KPA watchlists, claim submission age reports, and drill-down adjustment reports with export capabilities; managed workspace access, Per User PPU licensing, and production environment setup
- Led the full delivery lifecycle — architecture reviews, UAT coordination, hypercare support, change request governance, and weekly stakeholder alignment across WPI operations, IT, and finance teams

Project #2@Deccansoft:

Title	:	Elixir Social
Duration	:	June 2025 – Feb 2026
Team size	:	5
Position	:	Technical Lead & Solution Architect

Developed a full-stack, HIPAA-compliant social networking platform exclusively for healthcare professionals, medical students, and researchers — enabling secure knowledge sharing, credential-verified networking, and multi-model AI-assisted medical content analysis.

Key Contributions & Features:

- Built cross-platform mobile application using React Native targeting Android & iOS, with native navigation, push notifications, and a social feed
- Developed responsive React 18 + TypeScript web application with three-tab feed (For You / Following / Questions), infinite scroll, post creation, and real-time interactions
- Designed and implemented ASP.NET Core 8.0 RESTful API following Clean Architecture with JWT authentication, NPI credential verification, and OAuth integration
- Architected a 30+ table SQL database schema with multiple EF Core DbContexts (Main, Audit, ReadOnly) supporting HIPAA audit logging

- Integrated multiple AI providers — Google Vertex AI (Gemini 2.5 Flash Lite), Cerebras, Azure Foundry Models, Grok and Grok (xAI) = for AI-powered medical post analysis and streaming chat assistant with prompt injection protection and medical ethics guidelines
- Deployed on Microsoft Azure — App Service, Blob Storage, Notification Hubs and Application Insights
- Implemented HIPAA-first architecture including encrypted data handling, audit trails, and access controls across all layers

Project #3 @ Deccansoft :

Title	:	RiskDX
Duration	:	Mar 2020 – till date
Team size	:	3
Position	:	Team Lead

Environment

- C#, ASP.NET Core, Web API, Angular, Azure MySQL, Azure Web Apps, Azure Storage Service, Azure DevOps Pipeline (CI/CD pipeline), Power BI, Azure AI Search, Azure Text Translation, Azure Content Safety, Azure Open AI and Docker

Sub-Projects/Domains

- **RiskDX-Mobile App**
  - We have extended the RiskDX web app services to mobile app
  - Tools
    - C# and Xamarin.Forms
- **Needs Analysis**
  - Insurance Needs Analysis is a tool to help you decide how much Life and Critical Illness Insurance you need.
  - We have developed both Web App and Mobile App
  - Tools
    - C#, ASP.NET Core, Web API, Angular 8, Xamarin.Forms, Azure Web Apps and DevOps Pipeline

Description:

RiskDX offers a complete turnkey solution designed for rapid low-cost deployment:

- Product design and pricing with reinsurer support
- Branded platform for online and agent distribution
- Underwriting rules designed specifically for online and agent-assisted immediate issue.
- Analytics to provide ongoing improvements.

Responsibilities:

- Developing applications according to the client requirements.
- Key architectural decisions
- Assigning Tasks to Team members
- Writing business logic for the application.
- Publishing the app through DevOps pipeline
- Creating Power-BI Reports and Deploying to Power Embedded Service

Project #4 @ Deccansoft :

Title	:	Degen Dashboard
Duration	:	April 2022 – May-2022
Team size	:	4
Position	:	Programmer and Team Lead

Environment

- C#, ASP.NET Core, Web API, Storage account, Azure function app and CI/CD Pipeline

Description:

Degen Dashboard guides you through selecting your next node investment on the chain you like. We want to make DeFi safer and easier and accessible to everyone. It will collect and present the information; YOU make the investment decisions.

Project #5 @ Deccansoft :

Title	:	BOTMINDS
Duration	:	Jan 2022 – April-2022
Team size	:	5
Position	:	Programmer and Team Lead

Environment

- C#, ASP.NET Core, Web API, Signal R, WPF, Window Service, Azure Voice BOT, Azure Cloud Services

Description:

- BOTMinds – a pioneer in desktop autonomics.
- SELF-HEALING Prevent Problems when they occur.
    - Where problems can be automatically diagnosed and solved based on a predictive Self-Healing architecture. The system identifies underlying faults/defects and takes corrective actions to fix the problems itself, thereby eliminating calls to the help desk.
- Assisted/Self - SERVICE
- Prevent Problems before they Occur.
    - Automation Solution provide necessary information you probably wouldn't have discovered on your own until it's too late. It fetches required information through constant monitoring of call dumps, system issues, frequent errors, etc. Reporting problems after they have already happened limits your choices.
- Empower users to solve PC problems with/without help-desk intervention!
    - Automation recognizes that customers prefer taking charge of situations themselves rather than relying on a third person interaction to solve issues. In an era where 'Customer empowerment' and 'Help yourself' are the common buzz words, BOTNOMICS solutions offer a whole range of tools that can be used by customers themselves to find accurate answers conveniently and immediately. This approach drastically reduces issue resolution time.

Project #6 @ Deccansoft :

Title	:	SPRKLE MUSIC App
Duration	:	April 2020 – December 2024
Team size	:	2
Position	:	Programmer and Team Lead

Environment

- C#, ASP.NET MVC, Web API, Azure Cosmos DB, Azure Web Apps, Azure Storage Service, Azure Search service, Azure Service Bus, Azure Functions, Azure Web Jobs, FCM (Push Notification Service using Firebase), Angular Js ,React Js and CI/CD pipeline

Description:

SPRK MUSIC is a powerful social media and networking platform for musicians. It allows creatives to build their fan base, connect, collaborate and work with other artists within the industry.
A simple way to share your music videos and pictures on an entirely music-based community specially designed for vocalists, songwriters, instrumentalists, producers, composers, and DJs.
This platform is specific to the music industry unlike other platforms that are general in topic and are not setup with networking and talent spotting in mind. With three different ways of exploring new music you will find hidden talent somewhere. We have three trending modes in the newsfeed, a global search and an invaluable "Find Users" tool.

Responsibilities:

- Developing application according to the requirements.
- Key architectural decisions
- Assigning Tasks to Team members
- Writing business logic for the application.
- Publishing the app to azure server

Project #7 @ Deccansoft :

Title	:	Azure A2z
Duration	:	Feb 2019 – Mar 2020
Team size	:	3
Position	:	Programmer and Team Lead

Environment

- C#, ASP.NET Core, Web API, Angular 8, Azure SQL Server, Azure Web Apps, Azure Storage Service,Docker and CI/CD Pipeline

Description:

Azure A2Z stands true to its name as it provides the user knowledge and information about Microsoft Azure from A to Z. It aims to be a single stop repository of knowledge which educates the user not only about what and how of Azure certifications but also gets users to share their own personal experiences to help others out. Here, you will find Azure Events, Practice Exams, latest News on Azure, Top Azure Interview Questions, Jobs related to Azure, Azure Forum to share your knowledge and ask queries and lot more. The site helps users by simplifying the search process by preventing them from searching multiple sites for their required

questions and queries. The site also helps students and professionals by giving them Sample Exams and tests to better prepare them for their Azure Certification. Users can map their educational journey with the help of the website as it shows them the required certifications to reach the goal that they wish to attain.

Responsibilities:

- Developing application according to the requirements.
- Key architectural decisions (Microservices based architecture)
- Assigning Tasks to Team members
- Writing business logic for the application.
- Publishing the app in the azure environment (Azure Web Apps)

Project #8 @ Deccansoft :

Title	:	Living Well with Sickle Cell (LWSC)
Duration	:	Dec 2019 – Feb 2020
Team size	:	3
Position	:	Programmer and Team Lead

Environment

- C#, ASP.NET Core, Web API, Angular 8, Xamarin.Forms (IOS and Android) ,Azure SQL Server, Azure Web Apps, Azure Notification Service, Azure Functions, FCM (Firebase Cloud Messaging) and APNS (Apple Push Notification Service)

Description:

The Living Well with Sickle Cell phone application will allow patients who have sickle cell disease to better manage their daily lives. The components of the application will be specific to different factors of sickle cell management so that the application can be used effectively. Users will be able to log and track their medical appointments and other events with a calendar, as well as pain and mood levels and water intake. They can also compare trends between these aspects through a comparison analysis feature. There will also be a panic button function, which will be used to notify previously selected contacts if a pain crisis is occurring. In addition, users will be notified of extreme weather conditions and can explore current sickle cell news through an internal RSS feed. If patients allow, all of this information will be sent to researchers to help further sickle cell research.

Sandeep M V N

Senior Manager Projects,
+91-8374740544 sandeep.mvn@deccansoft.net

Responsibilities:

- Developing application according to the requirements.
- Key architectural decisions
- Assigning Tasks to Team members
- Writing business logic for the application.
- Publishing the mobile app to Play store and App Store
- Publishing the app in the azure environment (Azure Web Apps)

Project #9 @ Deccansoft :

Title	:	WHO Classification of Tumours Online (BlueBooks)
Environment	:	C#, ASP.NET Core, Web API, Angular, Azure MySQL Server, Web Apps
Duration	:	Mar 2019 – Till Date
Team size	:	2
Position	:	Programmer

Description:

The WHO Classification of Tumours book series is known worldwide as a reference in terms of pathological description of tumours. Called also Bluebooks, they have been a great success over the last 30 years and today the scientific community is expecting an evolution towards an electronic format.
The BlueBooks web site is dynamic by nature which makes available the content of the WHO Classification of Tumours book series and will handle Pathology whole Slide Imaging (WSI) with advance features like zooming, annotation of text and arrows and screenshot generation.

Responsibilities:

- Developing application according to the requirements.

Project #10 @ Deccansoft :

Title	:	Path Presenter
Environment	:	C#, ASP.NET MVC, Web API, Angular JS, Azure, SQL Server
Duration	:	June 2018 – August 2019
Team size	:	3
Position	:	Programmer

Description:

It provides a web-based service for healthcare professionals to present whole slide, radiology, and clinical images in a unique and meaningful way. Current presentations, tumor boards, or transporting of medical images is cumbersome. Each path a patient takes on their journey through patient care deserves to have the highest caliber of investigation. Using Path Presenter will create a seamless environment for you to present de- identified medical images, presentations and conferences.

Project #11 @Deccansoft

Title	:	Publications
Environment	:	C#, ASP.NET MVC, Web API, Angular JS, Angular 6, Azure, SQL
Duration	:	June 2018 – June 2019
Team size	:	3
Position	:	Software Programmer

Description:

Publications is a digital library. It is a platform for medical learning.

It is a subscription-based, digital library that includes books by different authors in different medical domains like Lung, Skin, and Neuro etc.

Authors will create Books by adding Clinical Features, Differential Diagnosis, Symptoms, Diagnosis Images, de-identified medical images.

- Authors can combine digital slides, videos, Images, links and description to create a book.
- Authors can add learning assistants for content creation.
- Multiple authors can collaborate for a single book by sharing the chapters.
- Digital slides, Media and attachments can be imported to create the content.

Project #12 @Deccansoft

Title	:	FitBlue
Environment	:	Xamarin, C#, ASP.NET Web API, Azure, SQL Server
Duration	:	Mar 2018 – May 2018
Team size	:	3
Position	:	Programmer/Designer

Aim of the project: Easy to get healthy by participating in challenges

Description:

- This project will help you increase your overall wellness by joining a team of friends or by using the app, earning points and motivating you along your fitness journey.

Project #12 @Deccansoft:

Title	:	Pravtek System Inventory management
Environment	:	Angular 4, Typescript C#, ASP.NET Web API, Azure, SQL Server,
Duration	:	Nov 2017 – Dec 2017
Team size	:	3
Position	:	Programmer/Designer

Aim of the project: To manage the server's inventory of an organization.

Description:

- This project will organize the application server at one place and can able to track application software, hardware and services. The application manages the user data mapped to the server and the application status..

Project #13 @Deccansoft:

Title	:	Best C Training Mobile App
Environment	:	C#, Xamarin – Forms, ASP.NET Web API, SQL Server
Duration	:	Sep 2017 – Oct 2017
Team size	:	1
Position	:	Programmer/Designer

Aim of the project: To make the C learning process easy for the students.

Description:

- This project helps to make the learning process easy for the students. User no need to go to the website and watch the C videos and read the C materials. The UI part is very simple and user friendly.

Project #14 @Deccansoft:

Title	:	BestDotNetTraining Mobile App
Environment	:	C#, Xamarin – Forms, ASP.NET Web API, SQL Server
Duration	:	Jan 2017 – Dec 2018

Sandeep M V N

Senior Manager Projects,
+91-8374740544 sandeep.mvn@deccansoft.net

Team size : 3

Position : Programmer/Designer

Aim of the project: To make the learning process easy for the students who are subscribed to BestDotNetTraining.com.

Description:

- This project helps to make the learning process easy for the students who are subscribed to BestDotNetTraining.com. User no need to go to the website and watch the videos and read the pdf materials now. The UI part is very simple and user friendly.

Personal Details: -

Full Name : Maram Venkata Naga Sandeep
